

# Jackson County Community Health Improvement Plan

## Annual Report

*Year One, Ending June 2013*

---

### Introduction:

Jackson County community partners, led by staff at Florida Department of Health Jackson County, conducted a Community Health Assessment (CHA) from March 2013-April 2013 and developed a Community Health Improvement Plan (CHIP) in June 2013 based on the data collected in the assessment.

Guided by the Mobilizing for Action through Planning and Partnerships (MAPP) process the 2013 Jackson County Community Health Assessment provides a snapshot in time of the community strengths, needs, and priorities. The 2013 Jackson County Community Health Improvement Plan serves to address health issues, roles and common goals and objectives throughout the community. The report is to be used to guide action and monitor and measure progress toward achievement of goals and objectives.

This document references the June 2013 Jackson County Community Health Improvement Plan. The plan can be found on the Florida Department of Health Jackson County Community Assessment Website: <http://jackson.floridahealth.gov/programs-and-services/community-health-planning-and-statistics/community-health-assessment.html>

<i>Progress at the end of year one, June 2013:</i>
No progress was made.

**Conclusion:**

Optimizing valuable and limited resources within the perspective of dedicated partnership is fundamental to community health improvement. Believing economic, environmental, health, social, political, and technological areas provide key trends, events or factors affecting the overall health and wellness of Jackson County the partnership will work together to seek effective resolutions to complex community concerns. Thank you to our partners participating in this process.
